Construction: The drawer interior is composed of 16 and 18 gauge solid stainless steel. The drawer slides are full-extension, zinc-plated steel with chrome-plated ball bearings, and attach to qwikSLOT inserts. They have side lever releases and detents in the closed position. The slide travel distance is 20.75". The drawer front surface is composed of molded ABS polymer, colored in Metro Taupe. Snap-on handles ("pulls") attach above the top recessed area and are available in a variety of colors. Optional self-adhesive label holders positioned in the recessed area under the pulls are also offered.

STARSYS™

Microban® antimicrobial protection inhibits the growth of stain and odor-causing bacteria on Starsys, keeping the surface areas “cleaner between cleanings.”

Easy to clean advanced polymer material is a marked improvement over traditional metal carts: won't dent, chip, rust, flake or corrode.

Interchangeable 3", 6" and 9" (76, 152 and 230mm) drawers with removable totes can be fully extended for easy access.

Color-coded drawer pulls are available in an array of choices to fit any system or decor.

Label holders available to quickly identify drawer contents.

Each drawer face has a 1/2 x 18 3/8" polished area allowing for secure adhesion of DYMO and Zebra labels (not supplied by Metro).

The convenient overbridge can be fitted with a wide selection of baskets, shelves, and bins to keep necessary items within reach.

Swing-out Side Storage units increase work surface up to 135%.

Side storage allows easy customization of a wide variety of accessories from trash can and Sharps container to storage bins and shelves.

5" (127mm) polymer total-lock casters provide a stable work station when locked and smooth rolling cart when not.

Starsys Carts

Starsys provides a complete system of enclosed carts in a wide variety of heights and system widths. When mobility is a key part of your storage needs, Starsys carts provide a broad selection of unique solutions. This modular system approach allows you to create a cart to meet your exact needs.

Starsys cart widths and depth:

The Starsys cart system is built upon a square module. Multiplying this storage module results in system widths of single 22 3/4" (578mm), double 42 1/2" (1080mm) and triple 62 1/2" (1588mm) widths. The depth on all carts is 24.9" (632mm).

Starsys cart heights:

Starsys carts are available in the following working heights: 36" (907mm), 39" (983mm), 42" (1060mm), 45" (1136mm) and 48" (1212mm)

General Overview:

Starsys carts feature 5" (127mm) polymer swivel casters. The front two casters have a Total-Lock Toe Brake (locks both the wheel and the horn).

Starsys carts feature a smooth polymer top/worksurface. If chemical resistance is a concern or heavy equipment is likely to be placed on the top of the cart, Starsys Mobile WorkCenters may be a more appropriate product selection.

An extended mobile base is required when Heavy-Duty drawers, Active Level shelving or qwikSLOT shelving is specified in a Starsys configuration. The extended mobile base adds an additional 3" (76mm) to the overall depth of the cart. The extended base combines additional counter weights with a deeper footprint to reduce any chance of overbalance when active level shelving is fully extended.

Mechanical Keylocks

The new M300 Series Keylocks have an "Ignition-Style" design to protect keys from bending or breaking. Mechanical keylocks are a good choice for all kinds of applications and work on all types of units and accessories – carts, cabinets, drawers, doors and wall cabinets. They are available as primary locks or as backups for other types of locking systems. Each lock includes a set of two keys. Extra keys available upon request.

Hinged Push-Button Lockbars

These versatile push button lockbars can be used to lock both drawers and doors. Because the push button mechanism is purely mechanical, no wiring, electronic or batteries are required. Each lockbar includes a backup M300 series keylock, 2 keys, and a passive security locktab (security seals ordered separately: LEC9900A = Bag of 100).

Electronic Push Button Locks ("EPBL" Locks)

The "EPBL" Lock is a simple push-button, battery-operated 4-digit code lock with a 10-digit push button face and 10-user programmable PIN numbers. Correctly entering a 4-digit code will allow a simple lock latch to be turned for access. Master, Sub-Master, User and Single Use functions. Power: (2) AAA Batteries.

Basic Electronic Keyless Entry Touchpad

A reliable, easy-to-operate electronic drawer locking system which operates entirely on six D-Cell batteries. No electrical plug-in or recharging is required.

Features:

- 250 User/Supervisor Codes (4-14 digits)
- Auto-Relock (programmable from 1 second)*
- Low Battery Indicator
- Non-volatile memory
- Panel-mount RJ11 port for audit trail download
- Optional user management software
